

Overview

The changes to AS9100 rev C are significant and will dramatically affect most organizations, and when combined with the required approach defined in AS9101, the changes are truly sweeping. In this two-day training, attendees will learn what those changes are and how to effectively address them in their organization.

Topics & Objectives

AS9100 rev C topics include:

- Documentation Requirements
- Risk Management
- Configuration Management
- Project Management
- Customer Satisfaction
- Corrective Action
- Internal Audits

AS9101 rev D topics include:

- Process Approach
- System Objectives
- Six Audit Methodologies
- Process Effectiveness Assessment Report (PEAR)

Management System:

- Process Approach
 - Turtles & SIPOC
 - Process Effectiveness Matrix
 - Process Identification
 - Process Sequence
 - Effectiveness Criteria
 - Monitoring, Measuring, Trending

Activities

Through open discussion and workshop activities, Eagle Force-presented tools will facilitate the understanding and proficiency with the new requirements and how they might be met in a manner that makes business sense.
